Subject: Permits for Guns

Public Safety and Security Committee:

Please Support HB 5408, Presentation of Carry Permits. We are devolving as a society because our legal framework for protection has turned into one where one must get shot first and then seek justice. The gun lobby exerts pressure that results in legislation that is not representative of the will of the people, rather the loud well-funded dogmatic extreme. Unless you are ready to implement complete mental profiling and mandatory training on regular basis, then we have no sane choice but to confront people wielding weapons for no statistical reason whatsoever.
